PROFESSIONAL SUMMARY

Computer Programming student with hands-on experience in mobile and frontend development using React Native, JavaScript, C#, and Firebase. Strong foundation in Object-Oriented Programming (OOP), software development principles, and cross-platform application development. Experienced in building real-time applications with Firebase Authentication and Firestore. Seeking an internship or junior role in Mobile or Frontend Development where I can contribute to scalable and user-focused applications. Familiar with Agile development practices and Git-based version control workflows.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript

Frontend Development: HTML5, CSS3, React.js, Responsive Design

Mobile Development: React Native, Android Development

Backend & Database: Firebase, Firestore, Firebase Authentication

Concepts: Object-Oriented Programming (OOP), REST API Integration, CRUD Operations, State Management

EDUCATION

Bandırma Onyedli Eylül University – Balıkesir, Türkiye

Associate Degree in Computer Programming

Expected Graduation: June 2026

Relevant Coursework: Software Engineering, Algorithms, Operating Systems,
Digital Networks, Embedded Systems, Software Development

PROJECTS

TIDE TASKS (In Progress)

Cross-platform task scheduling mobile application developed using React Native and Firebase.

- Implemented Firebase Authentication for secure login and user management
- Developed CRUD operations with real-time synchronization using Firestore
- Designed responsive and user-friendly mobile interfaces
- Integrated profile management features including password updates and dark mode support

RN HOTEL APP (April 2025)

Hotel booking and management mobile application built with React Native and Firebase backend services.

- Built a real-time hotel listing and booking system using Firestore
- Implemented user authentication and session management with Firebase Authentication
- Managed real-time database operations and dynamic UI updates
- Applied component-based architecture and state management principles

AUTOMOTIVE GALLERY AUTOMATION (C# Console App)

Console-based automation system developed in C# (.NET).

- Applied Object-Oriented Programming principles
- Built modules for data management and business logic operations
- Implemented structured and maintainable code architecture

TRAINING & COURSES

Siliconmade Academy – Fundamentals of Programming (Aug 2024 – Sep 2024)

- Developed School Student Management Console application using C#
- Strengthened OOP and algorithm development skills

Siliconmade Academy – Mobile Frontend Training (Oct 2024 – May 2025)

- Improved e-commerce web application using HTML, CSS, and JavaScript
- Developed mobile applications using React Native and Firebase

CERTIFICATIONS

- ICCW Certificate
- Fundamentals of Programming – Siliconmade Academy
- Mobile Frontend Programming – Siliconmade Academy
